PROTOPLASMA

IN VERBINDUNG MIT R. CHAMBERS UND W. SEIFRIZ

BEGRÜNDET VON FRIEDL WEBER UND JOSEF SPEK

FORTGEFÜHRT VON KARL HÖFLER

UNTER BESONDERER MITWIRKUNG VON

R. BIEBL, WIEN
J. BRACHET, BRUXELLES
N. KAMIYA, OSAKA
H. KINZEL, WIEN
A. PISCHINGER, WIEN
P. SITTE, FREIBURG I. BR.

HERAUSGEGEBEN VON

K. R. PORTER

CAMBRIDGE/MASS.

LXIII. BAND

MIT 256 TEXTABBILDUNGEN UND 1 FARBTAFEL

Abhandlungen

Seite

Aggarwal, S. K., and R. C. King: The Ultrastructure of the Wreath Cells of *Drosophila melanogaster* Larvae 343

Aranow, R. H.: Comparison of Theories of Teorell's Membrane Oscillator 206

Bairati, A., and A. Bairati: Some Ultrastructural Aspects of Cell Membranes . . . 283

Bangham, A. D., M. M. Standish, J. C. Watkins, and G. Weissmann: The Diffusion of Ions from a Phospholipid Model Membrane System 183

Berti, F., R. Lentati, M. M. Usardi, and R. Paoletti: The Effect of Prostaglandin E_1 on Free Fatty Acid Mobilization and Transport 143

Beyer, K. H., Jr., and J. E. Baer: Enzymes, Drugs and Transport Phenomena . . 112

Bolis, Liana, and G. Petti: Effects of Some Substances on Release of Acid Hydrolases of Rat Liver 106

Brachet, J.: Exchange of Macromolecules between Nucleus and Cytoplasm 86

Capraro, V.: Some Aspects of the Functional Polarity of Epithelia 21

Carlsson, A.: Transport of Biological Amines as an Element of Drug Action . . . 123

Caspar, D. L. D.: Surface Lattices and Membrane Design 197

Chapman-Andresen, Cicily: The Effect of Metabolic Inhibitors on Pinocytosis in Amoebae 103

Claude, A.: Mitochondrial Cristae during Liver Regeneration 275

Coleman, R., and J. B. Finean: Structural and Biochemical Features of Isolated Cell Surface Membranes 172

Copeland, D. E.: A Study of Salt Secreting Cells in the Brine Shrimp (*Artemia salina*) 363

Cotran, R. S., and G. Majno: Studies on the Intercellular Junctions of Mesothelium and Endothelium 45

Crane, R. K.: Na^+-Dependent Transport of Carbohydrates through Intestinal Epithelium 36

De Duve, C.: Lysosomes and Phagosomes (The Vacuolar Apparatus) 95

Finean, J. B.: X-ray Diffraction Studies of Cell Membranes 246

Folch-Pi, J.: Interrelationship between Lipids and Proteins in Membranes 160

Giacobini, E.: Energy Metabolism and Ion Transport Studied in Single Neurons 52

Glauert, Audrey M., and J. A. Lucy: Electron Microscopy of Negatively-stained Lipids 208

Guidotti, G. G., and P. P. Foà: Effects of Insulin on Glucose Transport in Chick Embryo Heart 126

Horne, R. W.: The Effects of Negative Stains on Lipids and Proteins Observed in the Electron Microscope 212

Johnston, J. M., and G. A. Rao: Intestinal Absorption of Fat 41

Karger, W.: Biophysical Aspects of Ionic Transfer across Membranes in Relation to the Mode of Action of Diuretics 128

Karnovsky, M. L.: Energetics of Transport 76

— **R. Graham, M. J. Karnovsky, K. Saito, A. W. Shafer, and E. Glass:** Phagocytosis and Related Phenomena 88

Keynes, R. D.: Ion Transport in Excitable Cells 13

Kolber, A. R., and W. D. Stein: Isolation of a Protein Coded for by the Permease Gene of the *Lac* Operon of *Escherichia coli* 309

Kolínská, J., and A. Kleinzeller: Some Aspects of Glucose Transport in Kidney Cortex Slices 56

Leaf, A., N. S. Lichtenstein, and M. M. Civan: Electrolyte and Water Transport across Epithelial Cells 17

Levine, R. Ruth, and Phyllis J. Kornguth: Absorption through Intestinal Epithelium as Influenced by Phospholipids 132

Mandel, P., and J. L. Nussbaum: Distribution and Turnover of the Phosphatides in the Intracellular Membranes and in the Myelin Sheaths of the Rat Brain . . 110

Mollenhauer, H. H.: The Fine Structure of Mucilage Secreting Cells of *Hibiscus esculentus* Pods 353

Seite

Morel, F., and **F. Bastide**: Relationships between the Natriferic Action of Oxytocin and the Active Transport of Sodium through the Frog's Skin 58

Nachmansohn, D.: Chemical Control of Excitable Membranes during Electrical Activity 295

O'Brien, T. P.: Observations on the Fine Structure of the Oat Coleoptile. I. The Epidermal Cells of the Extreme Apex 385

— and **K. V. Thimann**: Observations on the Fine Structure of the Oat Coleoptile. II. The Parenchyma Cells of the Apex 417

— — Observations on the Fine Structure of the Oat Coleoptile. III. Correlated Light and Electron Microscopy of the Vascular Tissues 443

Paganelli, C. V., and **S. K. Hong**: Effect of 5-Hydroxytryptamine on Sodium Transport across Bullfrog Skin 62

Pethica, B. A.: Structure and Physical Chemistry of Membranes 147

— Lipid Interactions in Aqueous Surfaces, Membranes and Micellar Systems . . . 181

Porter, K. R., **K. Kenyon**, and **Susan Badenhausen**: Specializations of the Unit Membrane 262

Rendi, R., and **A. E. Vatter**: Possible Location of Phospholipids and Structural Protein in Mitochondrial Membranes 202

Robertson, J. D.: Origin of the Unit Membrane Concept 218

Rosenberg, M. D.: Monomolecular Films at Saline/Fluorocarbon Interfaces 168

Rossi, C. S., **E. Carafoli**, and **A. L. Lehninger**: Active Ion Transport by Mitochondria 90

Schatzmann, H. J.: Effect of Cardiac Glycosides on Active Na-K-Transport . . . 136

Schlögl, R.: General Aspects of the Transport of Matter across Non-semipermeable Membranes 288

Schoffeniels, E.: Cellular Aspects of Membrane Permeability 66

Schulman, J. H., **M. Rosoff**, and **H. Erbring**: Surface Properties of Molecular Aggregates of Micellar Size in Relation to Membrane Permeability and Adhesion . . . 165

Segre, G.: Compartmental Models in the Analysis of Intestinal Absorption 328

Semenza, G.: Role of Intestinal Disaccharidases in Sugar Transport 70

Sjöstrand, F. S.: The Structure of Cellular Membranes 248

Skou, J. C.: The Enzymatic Basis for the Active Transport of Sodium and Potassium 303

Smyth, D. H.: Amino Acid Absorption through Intestinal Epithelium 26

Snell, F. M.: The Nature of Thermodynamic Coupling in Transport Processes . . . 99

Sollner, K., and **G. Shean**: Liquid Ion Exchange Membranes of Extreme Ionic Selectivity and High Transmissivity 174

Spyropoulos, C. S.: Temporal Resolution of Heat Exchange during Action Potential of Nerve 72

Stoeckenius, W.: Electron Microscopy of Fixed Lipids 214

Teorell, T.: Concluding Remarks at the "Symposium on Biophysics and Physiology of Biological Transport" 336

Thompson, T. E.: Experimental Bilayer Membrane Models 194

Tria, E., and **O. Barnabei**: Transport of Metabolites 1

— — Some Biochemical Aspects of Amino Acid Transport 30

Ussing, H. H.: Active Transport and Metabolism 292

Van Deenen, L. L. M.: On the Lipid Composition of Membranes 157

Vandenheuvel, F. A.: Structural Role of Water in Lipoprotein Systems 188

Varon, S., **H. Weinstein**, and **E. Roberts**: Sodium-dependent Metabolism and Transport of γ-Aminobutyric Acid in Subcellular Particles from Brain 318

Vogt, W.: Transport of Drugs across Membranes 121

Weinstein, H., **S. Varon**, and **E. Roberts**: Evidence for a Carrier-mediated Transfer Model for the Accumulation of ^{14}C-γ-Aminobutyric Acid by Brain Particles at Zero Degrees Centigrade 315

Wilbrandt, W.: Carrier Mechanisms 299

Wirz, H.: Countercurrent Principle 322
